Professional Summary

MERN Stack Developer with 1.9+ years of experience building scalable full-stack applications using React.js, Node.js, Express, and MongoDB. Strong in designing RESTful APIs, optimizing performance, and developing production-ready features in HRMS and SaaS platforms. Experienced in TypeScript, Next.js, and building end-to-end systems including authentication, workflows, and role-based access. Passionate about writing clean, maintainable code and solving real-world scalability problems.

Experience

Impulse International / Woco, Junior Software Engineer (Jun 2024 – Present)

- Designed and developed scalable HRMS modules (Document Directory, Offboarding, Expense Reports) using MERN stack, improving workflow efficiency.
- Built RESTful APIs using Node.js and Express for employee lifecycle management and data handling.
- Implemented role-based access and workflow logic for internal tools.
- Architected and developed a Performance Management System (PMS) using MERN stack and TypeScript, enabling structured employee evaluation workflows.
- Designed backend APIs for configuration settings, goal tracking, and performance reviews.
- Managed MongoDB schema design for scalable data storage and efficient querying.
- Designed and implemented a Shift Week Roster module for scheduling optimization, reducing manual planning time by 40%.
- Integrated Jira with internal support system (Woco Support) using API-based synchronization, improving issue tracking efficiency and visibility.
- Developed and maintained SEO-friendly, responsive landing pages using Next.js, focusing on performance optimization, bug fixes, and cross-browser compatibility to enhance load speed and user engagement across devices.
- Optimized frontend performance in Next.js applications, improving load time and SEO rankings.
- Reviewed and optimized code for performance, maintainability, and adherence to best practices.
- Led Shopify-based development for sister brands **Somersault** and **Aquatana**, building dynamic sections, adding new features, and fixing critical bugs to improve site performance and user experience.

The Zonzo, Software developer Intern (Oct 2023 - May 2024)

- Assisted in developing a SaaS product tailored to the hospitality industry, contributing to feature design, implementation, and iteration cycles.
- Collaborated with the product team to build user-centric modules that enhanced operational efficiency and client satisfaction.
- Participated in website development and optimization for responsiveness and accessibility across all major devices.
- Engaged in software testing, debugging, and routine maintenance to ensure minimal downtime and smooth functionality.

Technologies

Languages: JavaScript, TypeScript, Java, Python, HTML, CSS, SQL.

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Material UI (MUI), Tailwind CSS, Bootstrap.

Platforms & Tools: Git, GitHub, VS Code, Shopify (Liquid), Git Bash, Figma.

Design & Multimedia: Adobe Photoshop, Adobe Illustrator, Adobe Premiere Pro.

Education

MCA **Manipal University Jaipur**, Computer Science (Mar 2022 – Apr 2024)

CGPA: 8.48/10.0

BSC **Sri Dev Suman Uttarakhand University**, Science (Aug 2018 – Dec 2021)

Percent: 65%

Projects

Promanage [github](#) 

- Developing a full-stack project management system using MERN stack with TypeScript.
- Implementing RESTful APIs for task management, user roles, and workflow tracking.
- Using Redux Toolkit for state management and building a responsive UI with Tailwind CSS.
- Designing scalable backend architecture and MongoDB schemas for efficient data handling.
